Host cells transfected with vectors containing nucleic acid molecules encoding OPG binding protein are used to produce recombinant OPG binding protein is used in binding assays to determine osteoprotegrin (OC) in biological samples; to screen for specific binding agents (particularly agonists and antagonists, including cartecillular proteins); to raise Ab (useful in immunoassays for detection of OPG binding protein) and to identify compounds that and activation receptor (ODAR). The nucleic acid molecule encoding OPG binding protein and activation receptor (ODAR). The nucleic acid molecule encoding oPG binding protein can be used to detect OPG binding protein-encoding can activation receptor (ODAR). The nucleic acid molecule encoding oPG binding protein can be used to detect OPG binding protein-encoding calculations of opf binding protein, while complementary sequences are used for antisense regulation of OPG binding protein expression. Modulators of OPG binding protein particularly soluble forms of OPG binding protein can be used to treat or prevent bone diseases, e.g. osteoporosis, bone loss caused by arthritis or metastases, hypercalcaemia, Paget's disease, periodontal disease, osteoporosis, loosening of prostheses, continually in combination with agents that promote bone growth.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The present sequence encodes human osteoprotegerin (OPG) binding protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                nucleic acid encoding osteoprotegrin binding protein - useful for,
e.g. treating bone diseases by modulating osteoclast differentiation
and for diagnosis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 2274 BP; 658 A; 463 C; 523 G; 630 T; 0 other;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present sequence encodes an osteoclastogenesis inhibitory factor (OCIF)-binding molecule (OBM). The protein promotes and supports the absoration and maturation of osteoclasts in the presence of bone absorption factors such as calcitiol or parathyroid hormone (PTH). OBM is isolated from stroma cells cultured in the presence of a bone absorption factor by separation and solubilisation of membrane proteins then affinity chromatography using OCIF. It exists in a full-sequence form and a solubilised form (sOBM) which is a shorter chain. OBM may be used for screening potential inhititors and modifiers of its biological activity, and screening for receptors to OBM which mediate its function. These substances can then be used in the treatment of discorders of bone function and calcium metabolism. The antibodies can be used for assay
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         protein, for investigative and diagnostic purposes, and as

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          οy
                                                                                                                                                                                                                                                         Union intrioris datum at pine precursor.

Union intrioris datum at pine precursor.

C; Species: Equus cachectin; TNF alpha
C; Species: Equus caballus (domestic horse)
C; Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 04-Feb-2000
C; Accession: J01344
R; Su, X.; Morris, D.D.; McGraw, R.A.
Gene 107, 319-321, 1991
A; Title: Cloning and characterization of gene TNF alpha encoding equine tumor necrosis f
A; Reference number: J01344; MUID:92084125
A; Molecule type: DNA
A; Residues: 1-234 A:SUX>
A; Cross-references: GB:M64087; NID:9164244; PIDN:AAA30959.1; PID:9164245
C; Comment: This protein is an important proximal mediator of endotoxemia.

Sell 75:1169-1178(1993).
-!- FUNCTION: CYTOKINE THAT BINDS TO FAS ANTIGEN, A RECEPTOR THAT TRANSDUCES THE APOPTORIC SIGNAL INTO CELLS. MAY BE INVOLVED IN CYTOWIC T CELL MEDIATED APOPTOSIS AND IN T CELL DEVELOPMENT.
FAS-ANTIGEN MEDIATED APOPTOSIS MAY HAVE A ROLE IN THE INDUCTION OF PERIPHERAL TOLERANCE, IN THE ANTIGEN-STIMULATED SUICIDE OF MATURE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      TISSUE SPECIFICITY: EXPRESSED IN ACTIVATED SPLENOCYTES AND THYMOCYTES. MODERATE OR WEAK EXPRESSION FOUND IN SMALL INTESTINES, KIDNEY AND LUNG.
                                                                           CYTOPLASMIC (POTENTIAL).

Submitted (APR-1998) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: CYTOKINE THAT BINDS TO FAS ANTIGEN, A RECEPTOR THAT TRANSDUCES THE APOPTOTIC SIGNAL INTO CELLS. MAY BE INVOLVED IN CYTOXING T CELL MEDIATED APOPTOSIS AND IN T CELL DEVELOPMENT.
FAS-ANTIGEN MEDIATED APOPTOSIS AND IN T CELL DEVELOPMENT.
FAS-ANTIGEN MEDIATED APOPTOSIS MAY HAVE A ROLE IN THE INDUCTION OF PERIPHERAL TOLERANCE, IN THE ANTIGEN-STIMULATED SUICIDE OF MATURE T CELLS, OR BOTH.
-!- SUBUNIT: HOMOTRIMER (PROBABLE).
-!- SUBCELLULAR LOCATION: TYPE II MEMBRANE PROTEIN. MAY BE RELEASED INTO THE EXTRACELLULAR FLUID, PROBABLY BY CLEAVAGE FORM THE CELL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                CYTOPLASMIC (POTENTIAL)
SIGNAL-ANCHOR (TYPE-II MEMBRANE PROTEIN).

with a modified polylinker; 1st strand cDNA was prepared
from normal prostate bulk tissue, and was then primed with
a Not I - oligo(dT) primer. Double-stranded cDNA was
ligated to Eco RI adaptors (Pharmacia), digested with Not
I and cloned into the Not I and Eco RI sites of the
modified pT7T3 vector. Library is normalized, and was
constructed by Bento Soares and M. Fatima Bonaldo. "

The library was constructed in the vector pT773-Pac as described in Bonaldo, M.F., Lennon, G. and Soares, M.B. 'Normalization and subtraction: two approaches to facilitate gene discovery', Genome Research 6:791-806, 1996. The strand synthesis used a NotI-dT18 primer; double stranded cDNAs were ligated to EcoRI adapters, digested with NotI, and directionally cloned into the NotI and EcoRI-digested pT773-Pac vector. The library contained approximately 7.2 x 10^5 recombinants, with average insert sizes of 1-1.5 kb."

//ord=Tranded cDNA was ligated to Sal I adaptors (BRL),

double-stranded cDNA was ligated to Sal I adaptors (BRL),

digested with Not I and cloned into the Not I and Sal I sites of the pSPORT1 vector (BRL). Library was constructed by Matthew Clark (Lehrach lab; LORG) and Max Planck Institut fuer Molekulare Genetik, Berlin). CDNAs for EST analysis were selected following oligonucleotide hybridization fingerprinting of arrayed clones from zebrafish late somitogenesis (26 ss), adult liver or embryonic shield stage (5.6 h) libraries. Fingerprint data were used to computationally cluster cDNAs, and a single cDNA from each cluster was chosen for sequencing. In some cases multiple members of the same cluster were sequenced to assess clustering parameters or single clones were sequenced additional times to assess quality
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Bukaryotza: Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;
